

# GOH: Then vs. Now

Warehouses today are under immense pressure. From labor shortages and rising costs to customer delivery expectations, companies are struggling to keep up.

To make matters worse, most of the warehouses use manual processes to run their garment-handling operations, costing them valuable time and money. Fortunately, garments on hangers (GOH) is undergoing a revolution and now offers automated solutions.

AS/RS can reclaim  
**UP TO 85%**  
of otherwise wasted  
floor space.<sup>1</sup>

**85%**

## OUT WITH THE OLD, IN WITH THE NEW

### GOH Then

### GOH Now

#### SPACE UTILIZATION

Traditional static storage solutions require fixed aisles that waste expensive floor space.

Automated storage and retrieval systems (AS/RS) remove the need for a costly expansion by making better use of vertical space.

#### LABOR

Manual, repetitive tasks are time-consuming and laborious.

AS/RS operates with little employee intervention, allowing you to mitigate dependencies and combat labor shortage headaches.

#### WALK TIME

Pickers in manual warehouses can spend more than 70% of their shifts walking and searching for items.<sup>2</sup>

Automated systems significantly reduce the time employees spend walking up and down aisles looking for stored items.

#### PICK ACCURACY

Manual order picking increases errors (wrong items or quantities picked) that cost you time, money, and your reputation.

Automated systems boost picking accuracy rates to 99% or higher<sup>3</sup> by indicating the precise area an item is to be picked and how many.

#### PRODUCT DAMAGE

Manually handling garments at a high rate increases the likelihood of product damage during transit or packing.

With AS/RS, products can be transported more quickly, accurately, and safely.

**73%**

**73%**  
of warehouse  
managers can't find  
enough labor.<sup>4</sup>

## PUSH THE BOUNDARIES OF AUTOMATION

Schedule a call with Planiform's experts to talk about how automated GOH solutions can transform your business.
