

# The ROI of Planiform's Automated GOH Solutions

For many companies running out of warehouse space, expanding their facility or finding a new location may seem like the logical next step. But with warehouse space at a premium, that can be costly. In fact, warehouse rent in the U.S. has grown an average of almost 3% a quarter since mid-2020.<sup>1</sup>

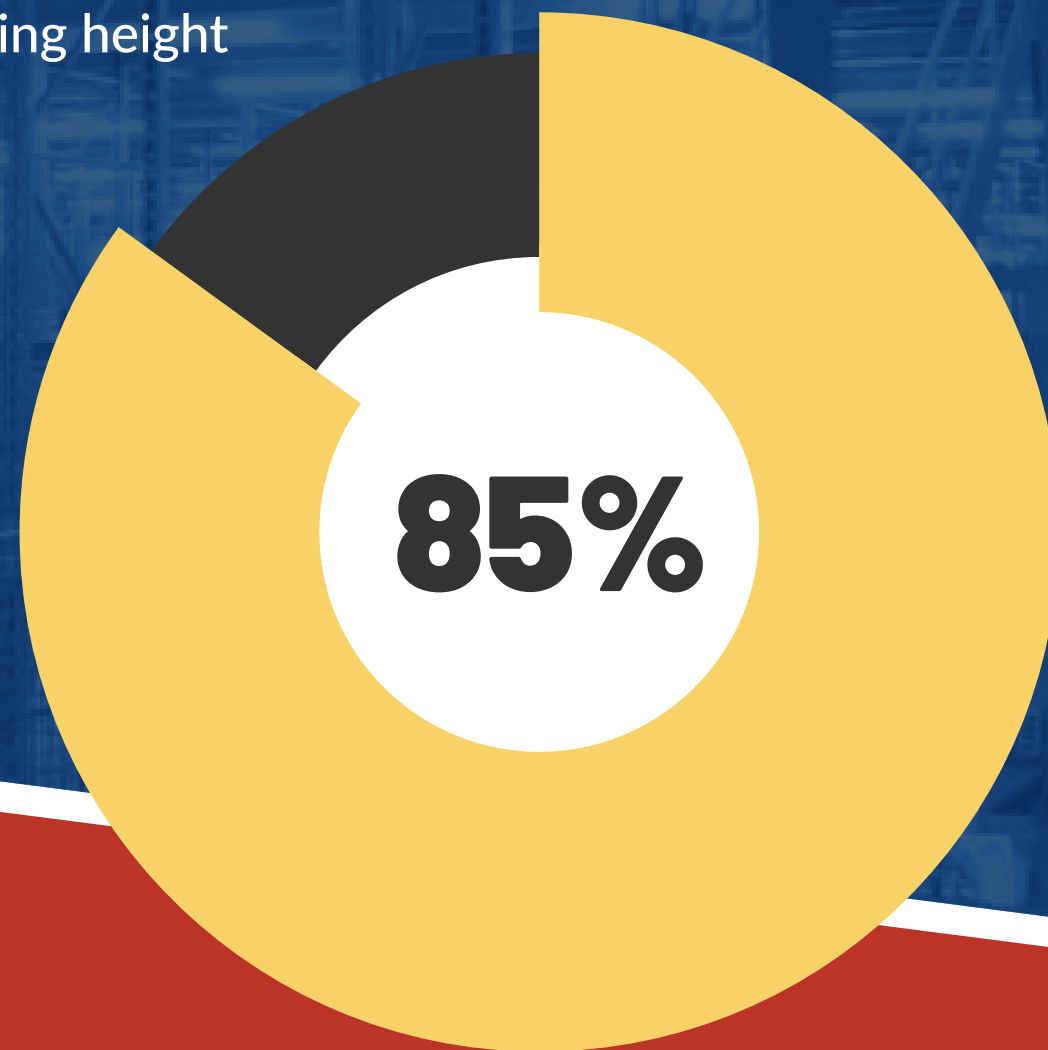

**Consider a more cost-effective option – optimizing your existing space with innovative garment-on-hanger (GOH) solutions.**

## WHAT KIND OF RETURN ON INVESTMENT (ROI) CAN YOU EXPECT?

### Maximized Space Utilization

Warehouses need effective space utilization to maintain a healthy bottom line. Automated storage and retrieval systems (AS/RS) maximize your square footage and ceiling height without the need for a costly expansion.

AS/RS can save **UP TO 85%** of your floor space.<sup>2</sup>

### Reduced Labor Costs

**Automated GOH solutions reduce labor costs** by mitigating dependencies (i.e., picking, storing, assembly, inventory replenishment) and minimizing labor shortage headaches.

### Enhanced Ergonomics

Automation decreases the foot traffic needed to move items throughout your warehouse.

**This increases productivity and reduces worker fatigue, resulting in fewer accidents and injuries.**

### Improved Pick Accuracy

AS/RS algorithms optimize pathing for accurate retrieval of garments.

These automated systems reduce picking errors and increase accuracy

**UP TO 99%**<sup>3</sup>

### Increased Pick Throughput

Automated GOH systems allow you to select garments quickly to process and ship orders faster and more accurately.

## HOW MUCH YOU COULD SAVE WITH PLANIFORM'S AUTOMATED GOH SOLUTIONS

**\$5 to \$7.50  
USD**

Cost per garment stored

**\$200,000 to \$1.9  
MILLION USD**

Average labor costs saved per year

**2 to 2 ½  
YEARS**

Average ROI time

## Make Your Warehouse a Competitive Advantage

Reimagine your warehouse with automated GOH solutions that increase speed, productivity, and throughput.
